Package Crosscut Saw ES121 with stationary saw unit

Package crosscut saw with tilting saw ES 121 – for the well-trying cut. The packages are accurately positioned under the saw by the moveable carriage. By means of the set-off device the cutting kerf can be opened (above photo shows a system with 2 set-off devices). The robust saw unit provides a perfect cutting surface, package by package. Application: unedged planks, clean cuts and middle cuts.

As perfect solution for cutting packages to fix lengths Holtec offers the package crosscut station type SHK: with moveable package carriage and stationary saw unit. High cutting accuracy and a solid construction distinguish this machine. With this saw you can carry out multiple cuts within one package absolutely clean and precise. More than 8000 delivered systems worldwide prove: Holtec package crosscut stations meet every requirement.

- Multiple cuts with opening of the cutting kerf
- Available either with length indication, positioning control or automatic control of the cutting process
- Package length individually programmable
- Carriage length up to 10 m
- Guide bar length up to 250 cm
- Maximum package cross section > 1,2 m × 1,2 m
- Saw drive 11 kW

Additional equipment

- Available with integrated waste conveyor
- Cut sequence by automatic control of the cutting process
- Strapping unit

Available with integrated waste conveyor

Available with strapping unit as an option

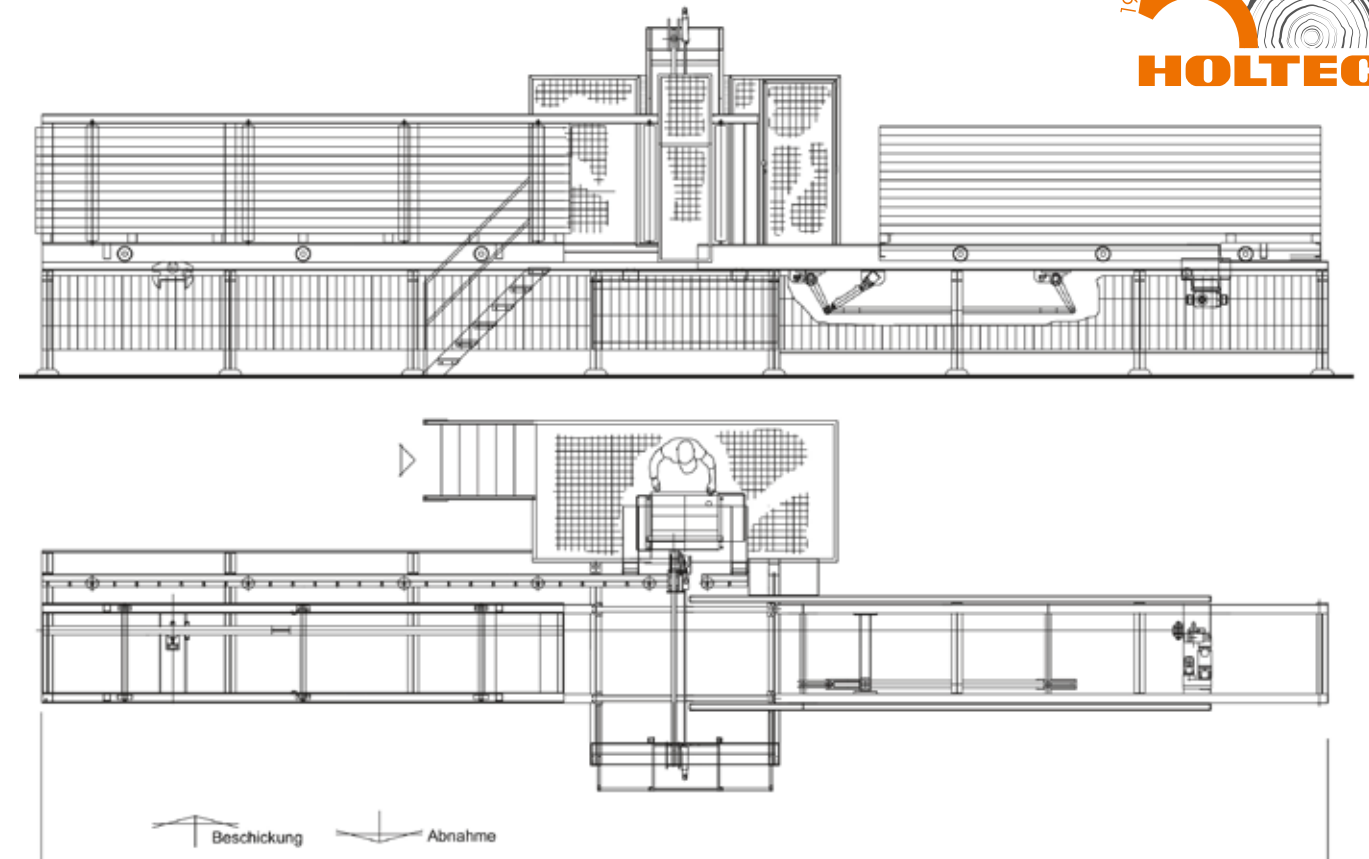

Sharpening unit included in the scope of supply

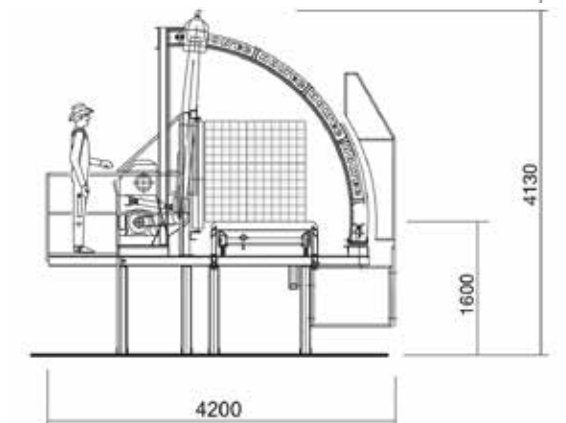

Available with several control options

Technical specifications – standard system
